Community Service

In December 2016, I started a non-profit against hate crimes. We call ourselves People Against Xenophobia, or PAX, and have started a [Facebook page](#) and [website](#) to spread stories of people working against prejudice and hate crimes. Our effort hinges on a simple premise. The number of intimidation incidents and hate crimes that have recently occurred is alarming, and they seem to be growing. Media loves to cover these incidents, but this large spread of media about hate crimes makes them appear normal, so that people holding prejudice seem to get social license for committing hate crimes. We work to spread stories where people took actions against hate crimes, so that “stopping hate crimes” becomes the social norm.
